

Deckbuilder Project

Technische Hochschule Mittelhessen
Software Engineering

Lastenheft

Presented by:

Lukas Hübner Matr.-Nr. 5604474

XX.XX.2026

Professor: Prof. Dr. Christian Prause

Module: EIT-F-XXX: Softwaretechnik

- **Theoretical Foundations:** This chapter provides the necessary theoretical knowledge and concepts that underpin the project, including digital twin technology, plant growth basics, grow-box casing design, and wireless connectivity.
- **System Concept & System Design:** This chapter outlines the design requirements, system architecture, hardware and software design, and UI/UX considerations.
